## **Evaluation**

PPSG has had a substantial impact on pupils' engagement in physical activity. We have broadened the sporting opportunities available, particularly through our partnerships with external providers and use of professional equipment. Participation levels increased, especially among our most vulnerable pupils and those with high needs, many of whom benefited from increased physical activity and structured sporting experiences.

PPSG expenditure enabled the academy to broaden the sporting opportunities available for all pupils. As a result of the funding we have an increased level of participation in sporting activities with pupils developing a love of sports and physical activities. The grant has also benefitted some of our most vulnerable pupils, including those high need pupils. These pupils have been able to increase their participation and as a result this has improved their physical activity levels.
